Education

- **PhD student in Deep Learning**– *11/2016 - 11/2019*

  Working on image captioning, neural machine translation and, more broadly, sequence generation/prediction models. Supervised by Jakob Verbeek and Laurent Besacier.

  A collaboration between the GETALP team (Groupe d'Etude en Traduction Automatique des Langues et de la Parole) of the LIG and the THOTH team of Inria.

  PhD funded by the labex Persyval-lab.

- **Ecole normale supérieure de Cachan - M2 MVA** – *class of 2016*

  Machine learning / Vision / Applied mathematics

  Key subjects: Probabilistic graphical models, Computer vision and object recognition, Deep learning, Convex optimization, Kernel methods in machine learning...

- **Ecole Centrale Paris (CentraleSupélec)** – *class of 2016*

  One of France's top Master level engineering school.

  Key subjects: Probability and Statistics, Convex optimization, Data mining, Deep learning, Reinforcement learning...

- **Math SUP/SPE**

  Intensive preparation in Math and physics for the entrance exams to the French *Grandes Ecoles*:

  Lycée Moulay Youssef, Rabat, Morocco *MP**. *2011/2012*

  Lycée Med Reda Sloaui, Agadir, Morocco *MPSI*. *2010/2011*

Research & Projects

- **Publications**

  Maha Elbayad, Laurent Besacier, Jakob Verbeek. Token-level and sequence-level loss smoothing for RNN language models. ACL 2018 - 56th Annual Meeting of the Association for Computational Linguistics , Jul 2018, Melbourne, Australia. pp.1-16. <hal-01790879>

- **M2 internship in R&D**

  – at Dassault systèmes (Data science team), Sept-April 2016

  Learn a metric for multimodal retrieval, mainly to find similar 3D objects to a given 2D query. The internship focuses on deep architectures such as siamese networks, deep belief nets and restricted Boltzmann machines.

- **M2 class project - Prediction of missing links in citation network**

  – Project at M2 MVA, Feb-Mar 2016

Accurately reconstruct the initial citation network from which edges have been deleted at random using graph-theoretical, textual, and semantic attributes.

- **M2 class project - Deep dreaming**

  – Project at M2 MVA, Jan-Feb 2016

  Implement Google deep dreaming algorithm to enhance the activation of a given layer in a deep network creating dreamlike images.

- **M2 class project - Tree-based context model for object recognition**

  – Project at M2 MVA, Dec-Jan 2016

  Implementing a probabilistic scene-analysis framework exploiting contextual information to detect multiple object categories in an image.

- **Deep learning - Eyeglasses detection**

  – Project at Ecole Centrale Paris & Safran Morpho, Sept-April 2016

  Team member:

  Training convolutional neural networks on facial images with noisy labels to detect glasses.

Miscellaneous

- *Programming languages & frameworks:*

  C, C++, CSS/HTML, Git, Java, Javascript, LaTeX, Matlab, Python, R, PyTorch, Caffe, Theano.

- *Languages:*

  Arabic (native), French (near native)

  English (excellent command - TOEFL iBT 108/120).

- *Campus activities:*

  - *Forum Centrale Supelec (2013-2015):* Member of the logistics sector, responsible for the planning and logistics of the third and fourth editions of the Centrale-Supelec job fair.

  - *Club Centrale Maroc (2013-2015):* Organizing an on-campus cultural day to spotlight the Moroccan culture and gastronomy.

  - *Centrale footbal club (CFCF) (2013-2015):* Participating with Centrale team at FFSU football tournaments and intra-schools competitions.
